

# Junction box

## B6577 / B6578

### Size

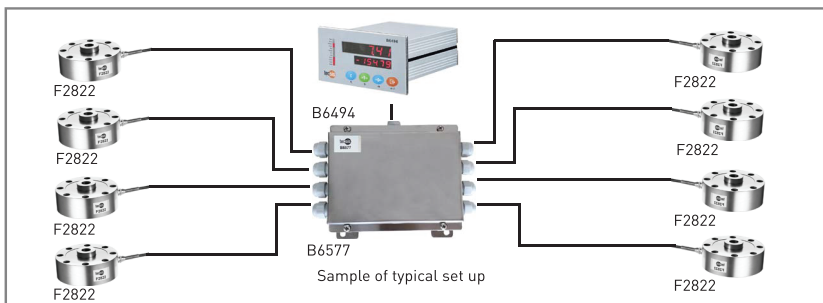

### Technical Parameters

Specifications	Technique
Operation temp range	-20~80°C
Protection class	IP67
Weight	0.8kg

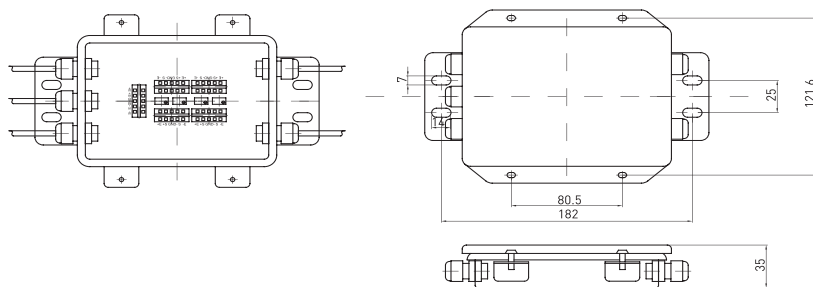

### Features & Applications

- 8 channel junction box
- Made of stainless steel
- Can be used for adjusting excitation voltage and signal integratim
- IP67 protection

### Size

### Technical Parameters

Specifications	Technique
Operation temp range	-20~80°C
Protection class	IP67
Weight	0.7kg

### Features & Applications

- 4 channel junction box
- Made of stainless steel
- Can be used for adjusting excitation voltage and signal integratim
- IP67 protection
